Professional Summary

Junior Data Analyst with strong foundations in Python, SQL, exploratory analysis, data cleaning, visualization, statistical testing and basic machine learning. Experienced building end-to-end analytical workflows and delivering insights that support decision-making.

Technical Skills

Programming: Python (Pandas, NumPy, Matplotlib, Seaborn, Scikit-Learn), SQL, JavaScript

Databases: PostgreSQL, MySQL

Data Analysis: EDA, statistical tests, A/B testing, feature engineering

Tools: Jupyter, VS Code, Excel, Google Sheets, Tableau, Git/GitHub

ML & NLP: supervised learning, vectorization, TF-IDF, model evaluation (accuracy, recall, F1)

Project Experience

- Built a full end-to-end analytical pipeline (cleaning, EDA, ML modeling) and generated business insights.
- Developed multiclass NLP model using TF-IDF and Scikit-Learn, evaluated with accuracy and F1-score.
- Performed profitability analysis using KPIs, identifying revenue and usage patterns for decision-making.
- Created customer segments through behavioral analysis (frequency, spend, patterns) for retention strategy.

Education

M.Sc. in Data Science — Universidad del Valle de México (2024–2026)

Certifications

Data Analytics — TripleTen

Web Development — Coderhouse

JavaScript — Coderhouse

Excel — Coderhouse

Languages

Spanish (Native) · English (Competent)
